ENGLISH JOCKEY CLUB WOULD BAR YANKEES, BUT WALES STOPS MOVE AND ADVISES DELAY.

On Prince's Suggestion, Committee Is Appointed to Make Inquiries and Devise Plan of Action.

LONDON, Nov. 2.—The stewards of the Jockey Club have issued a significant notice that in view of the large number of horses now in training at Newmarket, they are not prepared to entertain any fresh applications for licenses to train there.

Rigby, the American jockey, has been suspended by the Jockey Club for a fortnight for drawing overweight in the Old Cambridgeshire race. He has also been reprimanded for using "improper language" in the weighing room.

The report of the proceedings at the last meeting of the Jockey Club, held Oct. 21, which has just been issued, shows that a long discussion took place over Mr. James Lowther's amendment proposing to exclude foreigners from the allowances claimable by apprentices. Mr. Lowther frankly admitted that it was aimed at American lads and the abuses of which Lord Duham had complained.

Capt. Parker was not vindicated in any communications for publication on this side of the water. In Mr. Vanderbilt's first letter, made public after its receipt by Mr. Duryea, the inference was, however, that Mr. Vanderbilt was himself culpable through ignorance of the rules governing races and, apparently, with the impression that the seventy-footers sailed in other regattas under the same rules which the four owners had made for their special races. He could not insist that Duryea make public all or any of his letters, nor could he give their contents out without the latter's consent. The impression was created, at least in the minds of some people, that Parker had altered ballast without the consent of his employer, and this impression was not removed as publicly as the inference was permitted to spread.

Oh, yes, it might have been well to remark in my knock at English turkeys yesterday that we wouldn't handicap their horses with twenty-eight pounds imposts in match races here. Hager could just as easily have beaten Royal Flush if the latter had been dragging a coal cart, even with only a dead ton in it.

I hope the dark secret that George Considine is guarding so closely in the burglar-proof recesses of his breast won't cause him too much distress. Wouldn't it be just as well to loosen up, George, on whatever you may know of the McCoy-Corlett affair? If there was a deal, you know others must have been in it, and one of them may get there first. Your version would be interesting with these to corroborate it as, according to the called-back narratives of the women who talked, both were to lose. I know where most of the money was planted.

When Corbett came home from Europe last month he is said to have delighted the hearts of various persons who did him such services as getting him from steamer to tug, looking after his baggage, &c., by promises of tickets for his next flight. There is a broad field of experience in store for these persons if Corbett ever lights again. At that time they may learn that there is as much difference between Truthful James's promises and their fulfillment as between a speculator's prophecies and the real election returns. The big fellow is champion heavy-weight promoter.

Here is a story Bob Fitzsimmons told me, in all seriousness, concerning his pet lion:

"I used to punch the bag three minutes," said Bob; "then I'd give it one thundering swat and then I'd sit down and rest for one minute. As soon as I'd sit down that lion of mine would get up on his hind legs and knock the bag to and fro. Then he'd give it an awful blow to wind up, and go and lie down."

Is it any wonder that a thunderstorm caused the death of that wondrous lion? If we lived in the days of Good Deacon Anandas, the same storm must certainly have spared at least one bunch of lightning for the lion's voracious master.

There's one local scrapper, at least, who didn't sit around barrooms and bemoan the passing of Burton law protection. Terry McGovern didn't see any money in retelling "How I did it" to ephaphants and thirsty followers. He hustled out with a show, keeping an eye to business all the time. When he saw a nice place to put in a real scrap he and his never-too-late manager, Sam Harris, nailed it. There wasn't any trouble about getting the other end of it, and Bernstein may be considered more or less of an accident of chance. The harvest will be reaped in Louisville to-night, and the field won't show much stubble, either.

Harvard's football rushers are banging head on, at full speed, into a combination of planks and stuffing. In order to keep the stuffing in the thing it is mounted on rollers, but there is sufficient solidity to the hard pine to let the plungers know there's something in the way. This machine is designed to promote more or less disregard for personal inconvenience in plugging at an opposing line. It utility may be doubted as it can't grab back. Then the other fellows have a habit of not standing up like a rail fence to be smashed to ginders. There are the Indians, for instance—but that's a story of last Saturday.

Hoover, don't you grad! The Evening World! Some of the friends, please wake the wrestler and tell him that Paul Pons is here from way over in France. Better not show him the picture of Pons that was printed yesterday without explaining that the Frenchman will promise not to leave him over the ropes and all, a la Amazon. Pons isn't ruse, like the Turk; but he looks quite as deadly to us as the Indians, for instance—but that's a story of last Saturday.
